

GARAGES AND WORKSHOPS

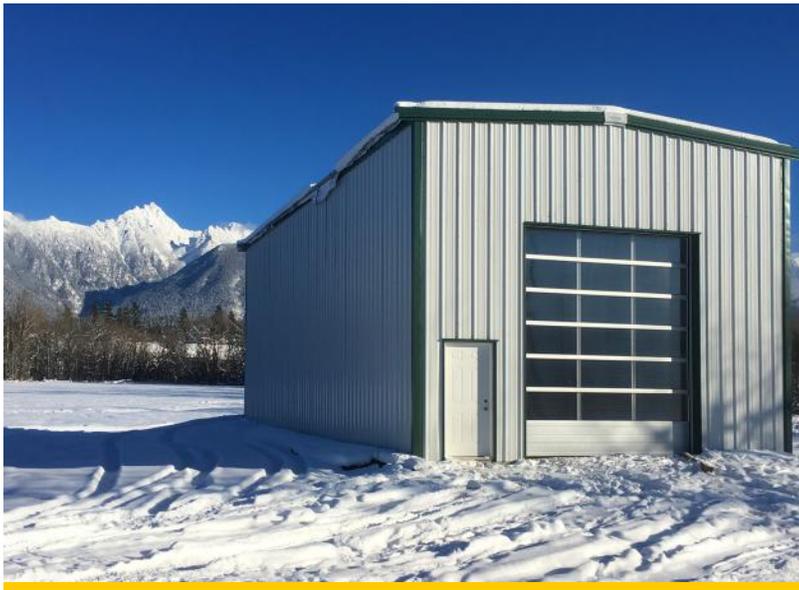

NORTH AMERICA'S LEADING PROVIDER
OF COMMERCIAL, INDUSTRIAL, AND
RESIDENTIAL STEEL BUILDINGS

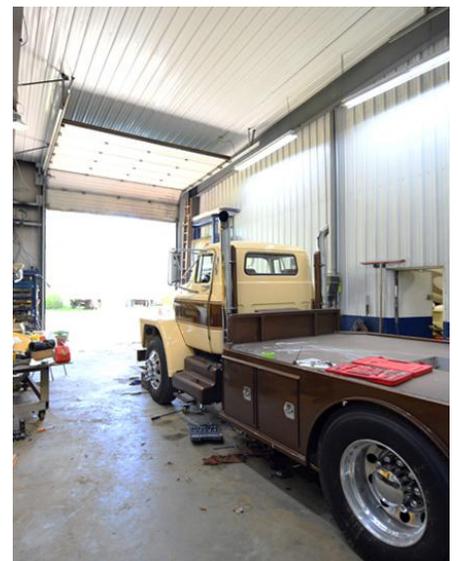

NORSTEEL *PREFABRICATED* BUILDINGS ARE IDEAL FOR GARAGES AND WORKSHOPS

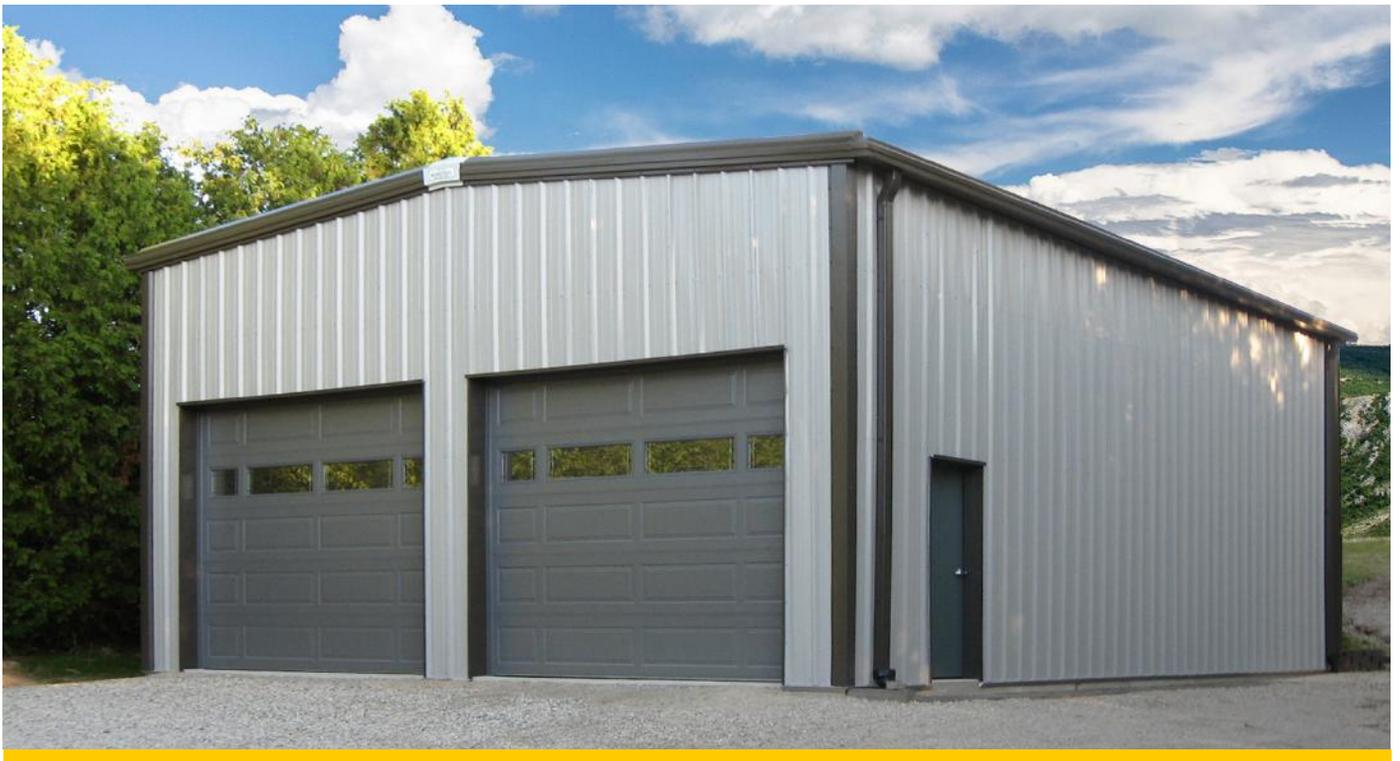

Norsteel has been built on a foundation of honesty and integrity. Over the years we have established ourselves as North America's leading supplier of award-winning, pre-engineered steel buildings. Our structures are designed, engineered, and fabricated in state-of-the-art manufacturing plants, which means we can deliver your finished product weeks faster than most others. All of our products are long-lasting, durable, and backed by industry-leading warranties.

Garages and workshops offer space ideal for workers to house their vehicles and work equipment. When used to store company equipment, safety is a paramount concern. The degree of use that these buildings get on a daily basis requires that they be both comfortable and durable.

Steel buildings offer custom-designed garage and workshop structures that are comfortable, safe, and sturdy. Their durability ensures that they will look great and reliably protect their contents for decades to come.

STEEL GARAGES AND WORKSHOPS

Steel is the ideal choice for all types of garages and workshops. It provides the flexibility to customize the building in almost any way imaginable. It also offers climate control and physical security to ensure your belongings are secure. Making your garage or workshop from steel reduces costs over time, as steel buildings require less maintenance and last longer than buildings made from other materials. You may use your workshop or garage for:

- Vehicle parking
- Vehicle storage
- General storage
- Mechanic workshop
- Construction workshop
- Equipment storage

NORSTEEL METAL BUILDING SYSTEMS: THE PERFECT SOLUTION

When storing company vehicles and equipment, you should accept nothing but the best building materials. These buildings need to provide the space and ventilation to create and maintain a comfortable environment for equipment and worker alike.

A Norsteel building is the ideal choice for workshops and garages, offering clear advantages over other common building materials such as wood and masonry. The flexibility of our pre-engineered materials will save time and make sure that the space is customized to meet your specific needs.

THE NORSTEEL ADVANTAGE

REDUCED COST

Our pre-engineered materials make it easier and faster to assemble our buildings; this reduces the time needed and labour costs during construction. Lower maintenance expenses provide additional value

DESIGN CUSTOMIZATION

Our team of engineering experts help you design the building you want. Depending on the location, you can also expand or alter the structure over time.

SUSTAINABILITY

The steel used in Norsteel buildings is nearly 100% recyclable; this makes it cost-effective and leads to less reliance on valuable natural resources

PEACE OF MIND

You can rest easy knowing that Norsteel buildings are safe and secure, providing superior and long-lasting protection

NORSTEEL BUILDINGS

Call Norsteel Buildings today. Our dedicated Building Specialists will work with you to understand your specific needs and to design a custom steel structure that best addresses your exact requirements.
